

VM Migration Starter Service

Datasheet

Introduction

Fsas Technologies Ltd provides a range of professional engineering and consultancy services to support customers who need to migrate virtual machines and workloads onto, off, or between same or different hypervisor platforms. This Datasheet details the scope, deliverables, and engagement model for the **VM Migration Starter Service** purchased from Fsas.

This service is designed to help customers move virtual machines and their data safely between virtualised environments with minimal disruption to day-to-day business operations. Fsas Professional Service Consultants bring hands-on migration experience, helping to ensure that virtual machines are moved safely, securely, and with minimal downtime.

Order Code	Description
FSP:G-PM49600GBDDS	VM Migration Starter Service (5 Day Consultancy Pack)

Service Scope and Engagement Model

This Service is delivered on a tailored, consultation-led basis. The exact scope and approach are agreed with the customer following an initial discussion, based on the source and target environments, number of virtual machines, and business requirements.

- **Off-the-Shelf Pack:** This datasheet covers a base pack of 5 days of Fsas Professional Services consultancy, delivered flexibly across planning, execution, and validation activities.
- **Additional Days:** Where a migration is more complex, or involves multiple vCenters, sites, or a large number of virtual machines, further consultancy days can be purchased in addition to the initial 5-day pack. The number of extra days required depends on the type and scale of migration involved.

- **Migration Types Covered:** This Service supports virtual machine migrations from Source Hypervisor to Destination Hypervisor (see matrix below).

Migration Type	Recommended Method
VMware → Proxmox	Proxmox Import Wizard
VMware → Nutanix	Nutanix Move
VMware → Hyper-V	StarWind V2V
Hyper-V → Nutanix	Nutanix Move
Hyper-V → Proxmox	qemu-img + VirtIO

Note: RDMs are excluded from this service because each configuration is customer-specific and can significantly increase the complexity of cross-platform migrations.

Service in Detail

The VM Migration Starter Service provides the following:

- Initial Consultation and Discovery
 - Fsas consultants will arrange a workshop to understand the current VM environment(s), the target environment, business drivers, and any timescales or downtime constraints.
- Migration Planning and Design
 - A migration plan is defined and agreed for the specific source and target environments involved.
- VM Migration Support
 - Hands-on or guided assistance to move virtual machines using appropriate migration tools, relevant to the source and destination hypervisor platform.
- Risk Assessment and Rollback Planning
 - Identification of risks specific to the migration, and agreement of a rollback plan should an issue occur during the move.
- Data Validation
 - Post-migration checks to confirm that virtual machines power on successfully in the target environment and that data and applications are accessible.
- Handover Documentation
 - A summary of the work carried out, together with any relevant configuration details will be provided to the customer's operations team at the end of the engagement.

More information

Fsas Technologies products, solutions & services

In addition to infrastructure services, Fsas Technologies provides a range of platform solutions. They combine reliable Fsas Technologies products with the best in services, know-how and worldwide partnerships.

Fsas Technologies Portfolio

Built on industry standards, Fsas Technologies offers a full portfolio of datacenter hardware, software and related services. This allows customers to select alternative sourcing and delivery models to increase their business agility and to improve their IT operation's reliability.
